Dear Reader:

In our great state, there are more than 930 cities and villages, 1310 townships and nearly 700 school boards. All of these government bodies are led by individuals chosen by voters to provide leadership, direction and guidance to their communities and to school systems. Whether in a big city or a small town, at every level, citizens are working to serve their neighbors.

This roster is a reference relating to all the municipalities, townships and school boards in Ohio. The data in this book is based on information provided to our office by municipal and township leaders and school board officials.

Aside from serving as a reference, this roster is evidence that our citizen-powered system of democracy works. Participation by those voting, and by those who lead, fuels our democracy and, indeed, is the fullest measure of our democracy.

Thank you to the leaders listed in this directory for your dedication, time and effort in serving your respective communities. Also, my thanks to those leaders who took the time to provide our office with the information compiled in this roster. Citizens and other officials rely on this roster as a valuable resource to better understand their government.

Sincerely,

Jennifer Brunner
Ohio Secretary of State

Introduction

The Ohio Municipal, Township and School Board Roster includes information on Ohio's local officeholders, their terms of office, the form of municipal government, as well as population figures and incorporation dates. The content of this book is available for download via the Internet through our Web site at www.sos.state.oh.us

Municipal court judges and clerks are included in the roster. Population totals reflect the 2000 U.S. Census Bureau figures. In addition, the 1990 U.S. Census Bureau totals are included.

A municipal corporation is classified as a city or village as defined in Ohio Revised Code section 703.01.

Municipal corporations with a population of 5,000 or more are cities. All other municipal corporations are villages. If the population of a city falls below 5,000 in a federal census, it becomes a village; if the population of the village increases to 5,000 or more, it becomes a city upon proclamation of the Secretary of State.

Either the general statutory form in the Ohio Revised Code or a municipality's charter determines the length of terms for officials found in this roster. **The date an elected official's term expires is found next to his or her name. Appointed officials have no length of term listed. An asterisk (*) appears with an official's name if he or she has been appointed to fill an elected office.**
